Kosher Purity

Glatt-Organics is certified kosher by the Central Rabbinical Congress and the Star-K. These certifications ensure that our employees, farmers, and managers all operate on a level of unprecedented purity and cleanliness. Kosher laws also dictate proper rituals for preparing meat and poultry to maintain humane practices and animal dignity. Moreover, certain kosher practices cause the tastes of our products to be raised to perfection. **Read more** to learn how following kosher guidelines raises the bar of health and quality of each Glatt-Organics brand.

Organic and Humane

Glatt-Organics has promoted animal rights and organic preparation long before these terms became known on the market. Each of Glatt-Organics brands uphold the highest certifications and quality standards the food industry has to offer. Our certifications include Quality Assurance International, Global Animal Protection, U.S. Department of Agriculture, Central Rabbinical Congress, and Star-K. We are also proud environmentalists, and only use bio-degradable packaging for our products. At Glatt-Organics, purity of the essence is not just our business, but our way of life. **Read More**
